RESPONSE TO RESTRICTION REQUIREMENT

Box FEE AMENDMENT
Commissioner for Patents
Washington, D.C. 20231

Sir:

The Restriction Requirement of October 1, 2002 has been carefully reviewed and the following election is made in response thereto.

REMARKS

In the above-identified Office Action, the Examiner has restricted the application to Group I, Claims 1-5, drawn to a method of making a metallic film consisting of giant single crystal grains and Group II, Claim 6, drawn to a metallic film of giant crystal grains.

Applicant(s) hereby elects with traverse the Invention of Group I, Claims 1-5 drawn to a method.

Applicant(s) believes the Restriction Requirement to be improper insofar as the Claims of the method of Group I and the Claims of the metallic film of Group II are so interlinked as to require that searching be conducted in identical classes and accordingly, Applicant believes that the search and examination of the entire application can be made without serious burden. Therefore, pursuant to MPEP Section 803, the Examiner should examine the entire application on the merits.

Respectfully submitted,

By
